

# Hearing Aid Research

We are better hearing

✚ *Better hearing is not a commodity. Better hearing is not something you can buy off the shelf or with the click of a mouse. Better hearing is an art, guided by science and delivered through technology by hearing experts.*

As the only privately held and American-owned company in its industry, Starkey Hearing Technologies is a world leader in manufacturing and the delivery of advanced hearing solutions. Our goal is to bring people together and make lives richer by empowering individuals to reach their full potential in life. Our commitment to hearing extends around the globe through our global philanthropic endeavors.

At Starkey Hearing Technologies, better hearing is not just our mission. Better hearing is who we are.

# Become a Part of Tomorrow's Technology

---

## *Research Participation*

The Audiological Research team at Starkey Hearing Technologies is seeking individuals to participate in ongoing research studies of new developments in hearing aid technology and digital sound processing.

Research studies are conducted several times a year and may involve anywhere from one to six visits over a four- to eight-week period. Visits are between a half hour and two hours long.

Participants evaluate new technology through laboratory evaluations and/or by wearing the research hearing aids in their everyday lives.

Research records are maintained in accordance with current privacy regulations. Involvement in research is voluntary; participants may withdraw at any time.

By becoming involved in research, participants gain a better understanding of their own hearing loss, learn about advances in new technology and have the opportunity to share their opinions and experiences with us.

At the end of the study, participants are paid a stipend for their contribution and are required to return the research devices. Participants who wish to purchase hearing aids are referred back to their hearing healthcare professional.

On behalf of Starkey Hearing Technologies, we would like to extend our thanks and appreciation for your help in finding solutions for better hearing.
