

PRECISION AUDIO IMAGING PRODUCT HIERARCHY

HIGH PERFORMANCE

PREMIUM PERFORMANCE

OPTIMAL PERFORMANCE

**CERRA**

- Precision Frequency Resolution (PFR)
- Dynamic Precision Directional Imaging (PDI)
- Multichannel expansion
- Multiple memories
- Programmable volume control, low battery and memory tones

**MESA**

- Precision Frequency Resolution (PFR)
- Dynamic Precision Directional Imaging (PDI)
- Multichannel expansion
- Multiple memories
- Programmable volume control, low battery and memory tones
- Adaptive noise management
- Adaptive feedback cancellation

**AXENT**

- Precision Frequency Resolution (PFR)
- Dynamic Precision Directional Imaging (PDI)
- Multichannel expansion
- Multiple memories
- Programmable volume control, low battery and memory tones
- Adaptive noise management
- Adaptive feedback cancellation
- In Situ measurements
- Programmable power-on delay

Three of a Kind

PRECISION AUDIO IMAGING PATIENT BENEFITS

HIGH PERFORMANCE

- Flexibility for changing hearing needs
- Offers good performance in background noise
- Offers good sound quality
- Offers accurate amplification for hearing TV and one-on-one conversations
- Offers three custom programs for different listening situations
- Automatically notifies of low battery, volume changes and instrument program changes

PREMIUM PERFORMANCE

- Excellent flexibility for changing hearing needs
- Offers excellent performance in background noise and other environments
- Offers excellent sound quality with automatic feedback canceller and noise manager
- Offers accurate amplification for hearing TV, telephone and in group settings
- Offers three custom programs for different listening situations
- Automatically notifies of low battery, volume changes and instrument program changes
- Hands-free operation

OPTIMAL PERFORMANCE

- Exceptional flexibility for changing hearing needs
- Offers exceptional performance in background noise and in very demanding environments
- Offers exceptional sound quality with automatic feedback canceller and noise manager
- Offers accurate amplification for hearing TV, telephone, conversations and in background noise
- Offers three custom programs for different listening situations
- Automatically notifies of low battery, volume changes and instrument program changes
- Hands-free operation
- Delay at start-up to avoid feedback

Since 1967, Starkey Laboratories has helped millions of people successfully embark on the journey to better hearing.

Starkey's family of digital solutions offers patients clinically-proven benefits.
