

Leonardo DaVinci is widely recognized as one of the world's most prolific innovator and inventor. We have named our newest and most innovative BTE series DaVinci to honor his spirit and legacy.

The DaVinci family of hearing instruments feature an innovative channel-back case design, advanced digital signal processing, and superior directionality. Two models are currently available: **DaVinci PxP** and **DaVinci PsP**.

- DaVinci PxP is the world's most powerful digital, directional hearing instrument
- DaVinci PsP is a hybrid design that can be configured as either a standard, super power instrument or an open, occlusion-free configuration
- Both instruments feature Adaptive Noise Management, Feedback Cancellation, and a powerful, Programmable Telephone Coil
- DaVinci's industry-leading levels of directionality provide exceptional performance in all listening environments
- Optional hands-free Bluetooth compatibility for a superior cell phone experience

We invite you to try the DaVinci instrument that's best for you.

As a preferred customer, you are invited to receive a complimentary demonstration on these exceptional products, plus a **FREE** comprehensive check-up of your current hearing aids. We've set aside preferred appointment times this week – call us today to reserve your appointment.

Sincerely,

We look forward to seeing and serving you in all of your hearing healthcare needs.
