

introducing  aspect

Now disappearing  
in ears everywhere.

How to make a  
hearing problem  
disappear.

# Introducing a new and different way to hear better.

Now there IS a new and different way to hear – without the hassles and limitations of conventional hearing aids.

from

Aspect is a new listening enhancer for those who've waited for a different, more convenient and discreet way to hear well again.

## Openly Different.

Aspect's soft Earbud fits securely inside your ear, yet keeps most of the sound

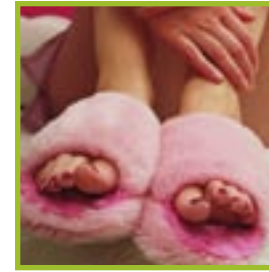

passageway unobstructed. This prevents the plugged-up feeling many experience wearing traditional hearing aids.

## (In)visibly Different.

All together, Aspect's shadow colored case, micro-thin tubing and tiny

Earbud give an almost invisible appearance, comparable to today's smallest premium hearing aids.

## Comfortably Different.

Aspect's "open" fit means there's less "hardware" between you and your world of sounds. So there's less to adapt to as you begin experiencing improved hearing.

## Easily Different.

Unlike more sophisticated aids, Aspect has no complicated controls or memories to learn or remember.

And because it does not need custom-fit, factory-made molds, you can be tested, finished and begin hearing better, all in one office visit!

Call today for a no-obligation appointment to see – and hear – for yourself how Aspect can help make your hearing problems "disappear."
