

Disappearing in ears everywhere.

Introducing *aspect* by 

If you or someone you know has been ignoring their hearing troubles because of the high cost of less visible aids, your excuse has now "disappeared."

Aspect™ is a new listening enhancer especially for those who've waited for a more convenient and discreet way to hear well again.

Aspect's unique micro-thin design takes advantage of your ears' hidden contours. The soft Earbud disappears securely

inside your ear without the plugged-up feeling many experience wearing traditional hearing aids.

Aspect's tiny size and color take full advantage of the ear's best hiding places!

Besides its invisible appearance, Aspect's "open" fit is the most comfortable and natural-sounding way to once again enjoy the full, rich world of amplified sounds.

And because Aspect does not need custom-fit, factory-made molds, you can be tested and finished in one office visit.

Call today for a no-obligation appointment to hear for yourself how Aspect can help make your hearing problems "disappear."

SPECIAL INTRODUCTORY EVENT:

Exclusive informational seminar

Your opportunity to ask all questions and find out more about this amazing technology.

THURSDAY-FRIDAY, APRIL 21 & 22 • 9AM-4PM

MEET JOHN DOE, STARKEY REPRESENTATIVE
