

Disappearing in ears everywhere.

Aspect™ is a new listening enhancer for those who've waited for a more convenient and discreet way to hear well again.

Aspect's unique micro-thin design takes advantage of your ears' hidden contours.

The soft Earbud disappears securely inside your ear without the plugged-up feeling many experience with traditional hearing aids.

Besides its invisible appear-

ance, Aspect's "open" fit is the most comfortable and natural-sounding way to once again enjoy the full, rich world of amplified sounds.

And because Aspect does not need custom-fit, factory-made molds, you can be tested and finished in one office visit.

Call today for a no-obligation appointment to see – and hear – for yourself how Aspect can help make your hearing problems "disappear."
