

# hearing problems?

## Take a look inside your ear.

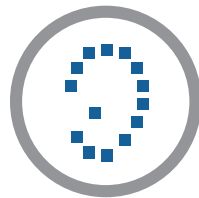

With our video otoscope you can see for yourself if earwax is a problem.

The Video Otoscope is a miniaturized camera that displays an exceptionally clear picture of your ear canal on a full-color monitor. You'll see right away if earwax is a problem.

The Video Otoscope can also help us determine the cause of fitting and other problems with your current hearing aids. Let us demonstrate this state-of-the-art technology to you at **NO CHARGE**. Please call ahead for an appointment.

**Your**  
**hearing consultation**  
**is being offered on:**

Please call to confirm this appointment time.

**ABC Hearing Aid Center** (800) 123.4567 or 123.4567

# you are invited . . .

You have been selected to have your hearing tested.

Please take this time to ask yourself:

- › do you find it difficult to understand others?
- › do you or your loved ones suspect you have a hearing loss?
- › do you have trouble hearing TV, the phone, or other everyday sounds?
- › has it been over 12 months since you've had a hearing test?

If you can answer yes to even one of these questions, this special hearing consultation may be important to you.

**ABC Hearing Aid Center** (800) 123.4567 or 123.4567

# digital c.i.C. (completely-in-canal)

## hearing aid is now available

We're pleased to announce that we are now offering the most popular hearing aid on the market - the almost invisible digital CIC (completely-in-the-canal). This hearing aid fits comfortably deep inside your ear canal making it virtually invisible. Many wearers have experienced the following benefits: **reduced interference from wind noise;** **more comfortable use of the telephone;** and **it's easy to wear.**
