

# WHEN RESULTS MATTER.

Diagnostically speaking, better hearing starts with reliable and accurate testing. Testing that is not only comprehensive, but is also a unified result true to individual requirements.

The **LIGHTWEIGHT** and **POWERFUL DP2000** is a state-of-the-art otoacoustic emissions screening and research device for newborns and adults. The easy-to-use system allows for evaluation of language disorders, Alzheimer's patients, functional hearing loss, behavioral disorders and mentally challenged patients.

Weighing less than 6 oz., the DP2000 screams for portability and has an adjustable range of 500 to 16,000 Hz for a variety of testing situations.

When results matter, Starkey's DP2000 provides the essential information for many successful fittings and evaluations.
