

HEARD ABOUT STARKEY'S STUDENT OPPORTUNITIES?

It shouldn't be a secret that ever since we offered the industry's first Audiology Internship Program in 1992, Starkey has remained firmly committed to education.

The Starkey First 2005 Student Outreach Program includes practical areas of original curriculum and offers graduate students exceptional scholarship opportunities.

Audiology student workshops emphasize the delivery of hearing care services in a

manufacturing environment. Workshops also feature well-known guest speakers who share their expertise and interact with participants.

Our commitment is further strengthened through the William F. Austin Scholarship. We offer up to \$50,000 in annual scholarships for graduate students pursuing clinical, teaching and research careers in audiology.

For application materials, stop by our booth at AAA or visit www.starkeyfirst.com.
